

BE6915001M BI Oven

Optimal results through precise technology

Thanks to the Core Temperature Sensor of this oven you can precisely monitor the cooking process from the center of your dish. Once the core temperature is reached you will get an acoustic signal.

Keep an eye on your dishes

The halogen lamps on both sides of the oven provide optimum visibility of the cooking process inside, illuminating your dishes as they cook. This makes it easier to quickly check on how your dish is coming along.
